

Recipe Finder

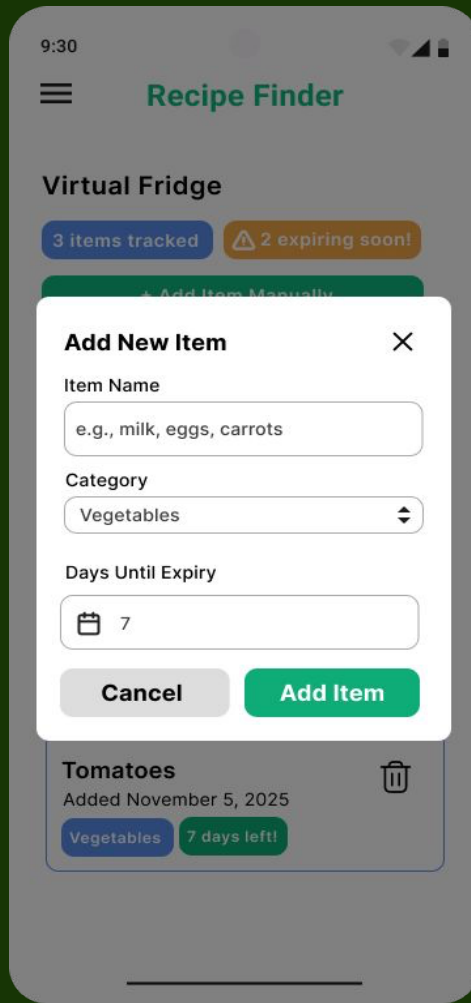

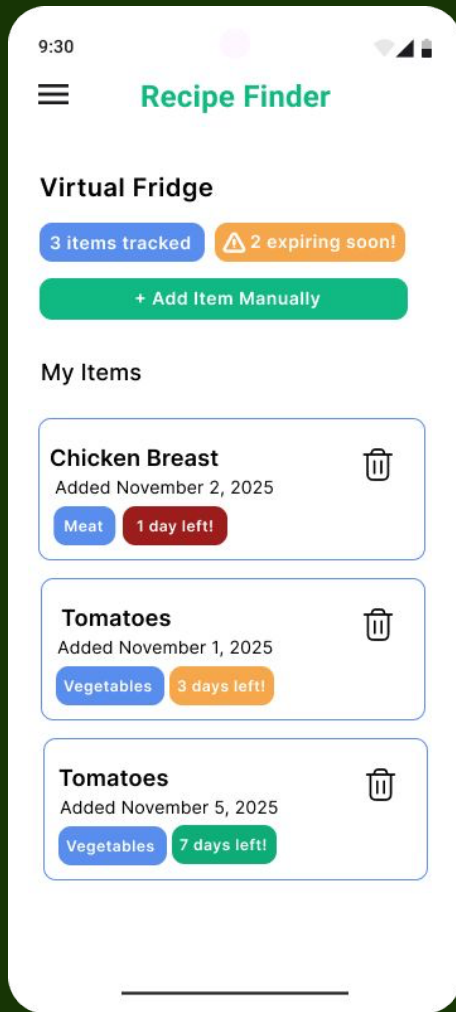

Show and Tell 2

Group 19

Improved UI

Virtual Fridge Fragment, Profile Dialogs

Features List

Recipe Generator

- Accepts user input for leftover ingredients and generates new recipes using Gemini API
- **Final Version:** supports image-based ingredient recognition to generate recipes automatically

Virtual Fridge

- Users manually add and manage leftover ingredients to help track what's currently available at home
- **Final Version:** integrates the stored ingredients with recipe generator

Features List

Favorite Recipes

- Save and view favorite recipes
- Quickly access previously generated or liked recipes

User Profile

- Stores user preferences (dietary restrictions, favorite cuisines)
- **Final Version:** personalize recipe generation based on user profile settings
